

SAEED KHADER ALZHRANI

Bachelor of Information Technology | IT Support, Networking & Customer Service
966546447644 | saeedkhzh@gmail.com | Jeddah – Rabigh , Saudi Arabia

CAREER OBJECTIVE

IT support professional who is just as skilled with people as with problems. I bring proven hands-on experience diagnosing and resolving technical issues quickly and efficiently, alongside an academic foundation in network administration and information security from King Abdulaziz University. I offer genuine commitment to service quality and a great user experience.

CORE SKILLS

- IT Support & Technical Troubleshooting
- Network Administration
- Customer Service & Communication
- Basic Cybersecurity Fundamentals
- Teamwork & Collaboration
- Time Management & Task Organization
- Fast Learner & Adaptable
- Attention to Detail

EXPERIENCE

IT Support Specialist — Nahj Al-Insaf Company (November 2025 – May 2026) - 7 Months

- Delivered first-line technical support to end users, resolving hardware and network issues promptly to minimize downtime.
- Installed, configured, and maintained systems and business applications across multiple workstations.
- Set up and troubleshooted printers and peripheral devices, ensuring consistent office productivity.
- Diagnosed and resolved recurring technical and network issues through systematic troubleshooting, improving system reliability.
- Delivered outstanding customer service through active listening and clear communication to resolve issues quickly.
- Collaborated with team members to resolve complex technical issues and maintain reliable IT services.

ACADEMIC PROJECT

MyFCITR – Graduation Project — Faculty of Computing and Information Technology, King Abdulaziz University

- Designed and developed as the graduation project for the Faculty of Computing and Information Technology, delivered through a dedicated team effort and sustained work throughout the project to build a complete digital platform serving students, and recognized as one of the key projects to receive direct support from the university.
- Built a course registration module that enabled students to manage their coursework online with speed and ease.
- Designed and developed a student suggestions module, serving as an effective bridge between students and faculty administration.
